

12 volt compact *micro* switch panel range

Powercentre switch panel templates, full size drawing allowing test installation for the proposed location.

Switches have a blue dot to indicate power on and a red dot indicates circuit breaker trip, switches have a option to fit two independent circuit breakers in the output. Switch legends illuminate white, panels are available in a choice of colour on a white or black base.

Switch legends are engraved to suit customer requirements, drawings give indication of the number and character size available. E-mail list of legends to info@kddpowercentre.co.uk we will supply a drawing for your approval, you then pay invoice on-line via web site, the panel is engrave and despatched normally within 5 days.
