

## SG03 shore / generator relay auto

operation ..... automatic

input ..... L & N from shore &  
generator

output ..... AC to switch panel

termination ..... via relay terminals  
control via 6 way connector

option terminals ....

replacement ..... **SG3**

fitted to

390, 410, 420, 450

### Notes

Unit normally supplies power to switch panel from on board generator set.

If boat is connected to shore AC mains, power will be transferred to shore side..

Status driver to panel will illuminate shore or gen window, indicating supply in use.
