

BD06 original bar-graph driver

amperage 30 amp nominal
monitoring net amps service battery
signal volts 5.0 volt @ 0 amp
power terminals M10 through stud
display terminals .. 1 x 12 way connector
replacement **B4/2** **30 amp**
available new only

fitted to

Sealine240 Se, 270 Se, 310 Am, 330 St,
360 Am.

Notes

Bar-driver measures magnetic field around power cable, and has infinite overload.

Provides signal to bar-graph display of net amps (charge / discharge) for the service battery.

The unit also supplies voltages to the digital voltmeter display in switch panel, and power feed from both battery banks to the link start relay.
