

Bilge pump alarm delay module

SEALINE Pt No EIPBPAD

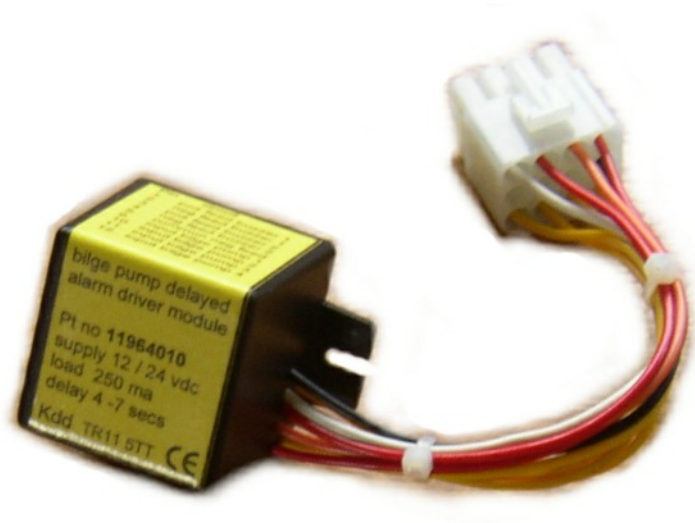

Powercentre Pt No 11964010

11964010 module 40 x 40 x 40 mm

Terminals 12 way female JST plug

Load 250 mA

Supply 12 - 24 volt DC

Bilge alarm delay module monitors up to four bilge pumps for operation.

If a pump running is sensed the unit initiates a 4 - 7 second delay. If the pump is still running the module activates two drive circuits for audio alarm.

If pump stops running alarm ceases.

Module supplied pr-wired to JST 12 way female terminal, pins and housing supplied free issue by SEALINE.

Connections :-

- 01 Positive feed alarm 1
- 02 Negative feed alarm 1
- 03 Positive feed alarm 2
- 04 Negative feed alarm 2
- 05 Common negative supply
- 09 Input bilge pump 1
- 10 Input bilge pump 2
- 11 Input bilge pump 3
- 12 Input bilge pump 4
