

Radar diode pack

SEALINE Pt No EIRDP

Powercentre Pt No 12234001

12234001 sensor 60 x 50 x 23 mm

Rating10 A cont 15A intermittent

Voltage 12 / 24 V DC

Sealed to IP66

Diode pack provides the radar and other sensitive equipment a clean power supply when the engine is being started from the common service / start battery bank.

The module has two inputs (port and starboard battery banks) and four output terminals.
